
THE HEART BEAT

GRAPHIC METHODS IN THE STUDY
OF THE CARDIAC PATIENT

By

Aldo A. Luisada, M.D.

*Associate Professor of Medicine and Director, Division of Cardiology,
The Chicago Medical School, under a Teaching Grant of the
National Heart Institute, U. S. Public Health Service*

*Associate Visiting Physician (Acad. Staff) and Chief of Cardiac Clinics,
The Mount Sinai Hospital of Chicago*

*Chief of Service and Cardiologist,
La Rabida Hospital for Rheumatic Children*

Preface		xi
PART I. INTRODUCTION		
1.	Historical Outline	3
2.	The Heart Beat	8
PART II. NORMAL TRACINGS: TECHNIC AND INTERPRETATION		
SECTION A. VIBRATIONS OF THE THORACIC AND ABDOMINAL WALLS DUE TO CARDIOVASCULAR ACTION		
3.	Tracings of the Rapid Vibrations of the Chest: <i>Phonocardiography or Stethography</i>	25
4.	Tracings of the Slow Vibrations of the Chest: <i>Cardiography</i>	64
5.	Tracings of the Pulsations of the Epigastrium: <i>Epigastric Tracings; Epigastric Cardiography</i>	74
6.	The Atrial Wave in the Various Tracings	78
SECTION B. VIBRATIONS OF THE BODY DUE TO CARDIOVASCULAR ACTION		
7.	The Ballistocardiogram	81
SECTION C. VENOUS PULSATIONS		
8.	Tracings of the Pulsations of the Jugular Veins: <i>Phlebography; Jugular Tracings</i>	94
9.	Tracings of the Pulsations of the Liver: <i>Hepatography; Hepatic Tracings</i>	104
SECTION D. INTRATHORACIC TRACINGS		
10.	Tracings of the Pulsations of the Esophagus: <i>Esophagocardiography</i>	110
11.	Tracings of the Pulsations of the Air Passages: <i>Internal Pneumocardiography</i>	116
12.	Tracings of the Pulsations from the Pleural Cavity: <i>Pleural Tracings</i>	126

SECTION E. ARTERIAL PULSATIIONS

- | | | |
|-----|--|-----|
| 13. | Tracings of the Pulsations of the Aorta: <i>Aortography</i> | 128 |
| 14. | Tracings of the Central Pulse: <i>Carotid and Subclavian Sphygmography</i> | 132 |
| 15. | Tracings of the Peripheral Pulse: <i>Brachial, Radial, Femoral, Tibial, Pedal, and Digital Sphygmography</i> | 136 |
| 16. | Sound Tracings of Peripheral Vessels: <i>Phonoarteriography; Phonophlebography</i> | 143 |
| 17. | Tracings of the Volume of the Limbs, of their Segments, or of the Abdomen: <i>Plethysmography</i> | 146 |

SECTION F. PRESSURE TRACINGS

- | | | |
|-----|--|-----|
| 18. | Tracings of Arterial or Venous Pressure: <i>Graphic Sphygmomanometry and Phlebomanometry</i> | 153 |
| 19. | Tracings of Intracardiac and Intravascular Pressure: <i>Cardiomanometry</i> | 163 |

SECTION G. RADIOGRAPHY OF THE MOTIONS AND VOLUME CHANGES OF THE HEART AND LARGE VESSELS

- | | | |
|-----|---|-----|
| 20. | Tracings of Cardiovascular Pulsations on the Roentgenogram: <i>Roentgenkymography</i> | 172 |
| 21. | Tracings of Cardiovascular Pulsations on the Fluoroscope: <i>Electrokymography</i> | 178 |
| 22. | Tracings of Variations of Electrical Resistance of the Chest Due to Cardiac Action: <i>Rheocardiography</i> | 206 |
| 23. | Tracings of Discharges of Radioactive Materials within the Heart: <i>Radiocardiography</i> | 208 |

SECTION H. RESPIRATORY TRACINGS

- | | | |
|-----|--|-----|
| 24. | Tracings of External Movements Connected with Respiration: <i>Pneumography</i> | 211 |
| 25. | Tracings of Pressure and Speed of Respiration: <i>Pneumotachography</i> | 214 |
| 26. | Tracings of Bronchial Functions: <i>Electrobronchography</i> | 218 |
| 27. | Tracings of Volume of Air: <i>Spirography</i> | 220 |

SECTION I. TRACINGS OF ELECTRICAL PHENOMENA OF THE HEART AND VESSELS

- | | | |
|-----|--------------------------------------|-----|
| 28. | General Electrocardiographic Technic | 222 |
|-----|--------------------------------------|-----|

29. The Electrocardiographic Leads and the Electrocardiogram	229
30. Special Electrocardiographic Technics	247
31. The Electrical Axis, Vectorcardiogram, Ventricular Gradient	257
32. The Electroangiogram	266
PART III. PHYSIOLOGIC VARIANTS OF THE GRAPHIC TRACINGS	
33. Tracings in Normal Adults	271
34. Tracings of the Fetal Heart	279
35. Tracings in the Child	285
36. Tracings in Pregnancy and Puerperium	289
37. Tracings in the Aged	292
38. Tracings in Various Mammals	294
39. Modifications of Tracings Caused by Drugs and Physiopathologic Variants	305
PART IV. CLINICAL APPLICATIONS OF GRAPHIC METHODS	
40. Rheumatic Disease (Rheumatic Fever)	311
41. Mitral Valve Lesions	317
42. Aortic Valve Lesions	336
43. Tricuspid Valve Lesions	353
44. Pulmonic Valve Lesions	364
45. Uncomplicated Shunts	371
46. Complex Congenital Malformations of the Heart	381
47. Disturbances of the Cardiac Rate and Rhythm	391
48. Diffuse Myocardial Lesions	418
49. Coronary Heart Disease: Including Myocardial Infarct	442
50. Diseases of the Pericardium	458
51. Diseases of the Aorta and Pulmonary Artery	466
52. Hypertension	476
53. Peripheral Vascular Diseases	484
54. Heart Failure	489
APPENDIX. DESCRIPTIONS OF VARIOUS APPARATUS	
Electrocardiographs	495
Phonocardiographs or Stethographs	500
Ballistocardiographs	504
Electromanometers	505
Electrokymographs	506
Index	509
